#### Introduction and State of the Art (500-750 words):

The group must document appropriate understanding of the societal challenges and research fields they seek to include. The proposal should indicate how the project may supplement previous research and contribute to new knowledge.

#### Theoretical Framework & Research Methodology (up to 2000 words):

- The group must provide a short description of the particular research topic they seek to address and provide an account of how the collaboration between the research disciplines (and ideally non-university partners) can contribute to the solutions of these particular challenges.
- Describe the basic working principles and concepts, and why the chosen approach/specific mix of approaches is suitable to address the research question. How will the interdisciplinary collaboration be set up in terms of methods? Include a short assessment of the feasibility of the approach.
- Ideally, the project description provides preliminary information on the empirical basis of the project (for instance primary and secondary sources, fieldwork, interviews, statistical information) and what types of materials will be used / needed. Describe the transdisciplinary and/or interdisciplinary approach and the according interdisciplinary collaboration set-up in the team
- ATTENTION: You may have to split the text into two boxes due to the techical conditions of this form.

Theoretical Framework & Research Methodology - Continued		
Project Plan		
Work Plan for the EPICradle including a brief timeline (500-750 words):		
• This section should contain a brief description of how the project should be developed during the EPICradle. It should include a basic assignment of tasks / roles to the different team members based on their		
<ul> <li>qualifications and interests.</li> <li>The project must be realistic and feasible - scientifically, organizationally and in relation to available resources / formats of collaboration in the EPICradle (hybrid). Ideally this work plan indicates what type of funding, whether through the EPICluster or other funding schemes (if others, please indicate them), is envisioned for the developed project (this can change during the EPICradle of course).</li> <li>The project description must also account for how the applicants will fulfill the demands of the project if the project requires skills that are not apparent from the rest of the application (language, methods etc.) and what type of support they will require during the EPICradle.</li> </ul>		

Bibliographical References (please use Chicago, Endnotes only):	
Please only add the most relevant background literature with a maximum of 10-15 citations.

thical Considerations (un to 150 words).
Ethical Considerations (up to 150 words): t must be considered whether there are any ethical questions related to the implementation of the project. If that is the case, a description of how these will be addressed must be included.
These so considered wheeler there are any eliment questions related to the implementation of the project. If that is the case, a description of how these will be addressed must be included.
nterdisciplinary Collaboration & Envisioned Transfer
Biographic Abstracts of Applicants (max. 150 words per applicant, 250 words for a common paragraph), highlighting research, teaching and/or outreach experience and overlapping/
omplementary interests:
<ul> <li>This section can be arranged as one text or list the applicants followed / preceded by a common paragraph outlining why this team works as a complementary group.</li> <li>Please indicate any experiences of the group members which shows the capacity of the group to tackle the proposed ideas. This may include any type of research projects that relate to the proposed ideas or planned methods in a meaningful</li> </ul>
way.
• Please indicate any experiences of the group members which shows the capacity of the group to tackle the proposed ideas. This may include any teaching or outreach projects that relate to the research ideas in some meaningful way.
Envisioned Output & Dissemination Proposal (up to 300 words):
his section should outline envisioned outputs of the project and how they could be disseminated among the relevant communities. This output should not only consist of academic work but also include innovative
ormats that reflect the interdisciplinary as well as the transdisciplinary aims of the project (if applicable). Envisioned output and ideas for dissemination of results should take into consideration diverse audiences.
